

## VM 5400/6500

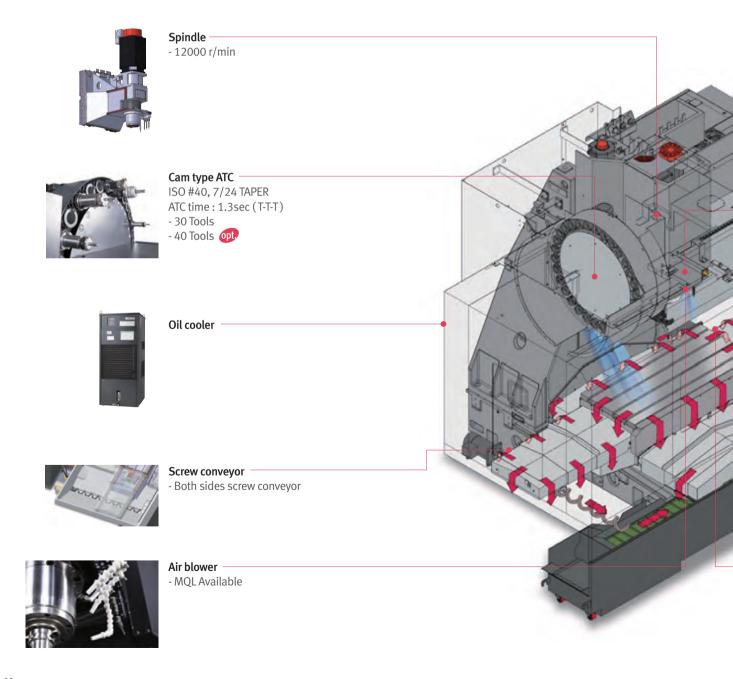

High Performance Vertical Machining Center for Die / Mold Machine

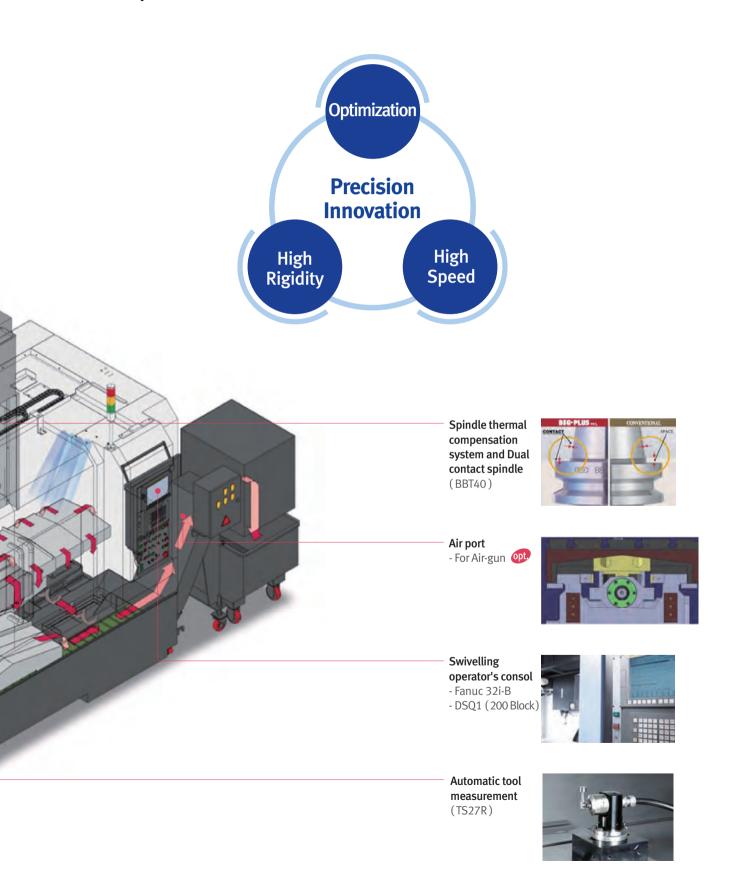

## VM 5400/6500

## Standard core features for high precision mold processing

The efficiency and competitiveness achieved by the user is optimised by the core features which are standard on the machine. These include face / taper contact spindle nose (BBT40), effective spindle cooling system and air blower for chip removal when dry cutting. These features contribute to the machine's capability to produce high quality dies and moulds.

# High Performance Vertical Machining Center for Die / Mold Machine

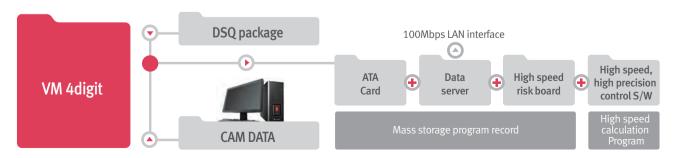

VM 5400 / 6500

#### Die & Mold Solution

#### **Data Server & Risc Board**

With a mounted mass storage data server and CPU, it is possible for high end processing of mass storage programs.

DSQ package upgrades productivity and mold processing quality with individual tuning of machinery features, high speed processing by mass storage programs and enhanced superb command following capacity.

# **Optimized Tool Processing Solution** Superior surface finishes and machining accuracy are achieved through using standard processing solutions such as high-speed / high - precision contour control and

VM 5400 / 6500

### High speed / Precision contour control

\* DSQ: Doosan Super Quality

Smoothes the movement of the machine, improving surface roughness and profile accuracy of corners and edges.

• DSQ1 (AICC2\_200 Block+ Machining condition selection function) std.

▶ with DSQ

▶ without DSQ

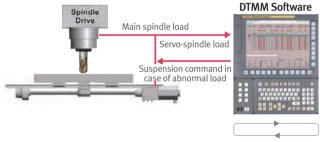

## High efficient DTMM opt

\* DTMM: Doosan Tool load Monitoring for Machining Centers

thermal displacement compensation.

Damage minimization technology in each tool and device part during processing.

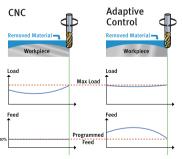

- Detection cycle = Program interpolation cycle ✓
- Equipment suspension command in case of abnormal load
  - Replacement tool decision and command to NC ✓

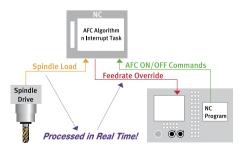

## The optimal feed control optimal

Optimal feed control is based on checking the load of spindle at real time.

#### Machining condition selection function

- It is possible to change machining condition in 10 steps by using R code at the program.
- Improving productivity (high speed at rough machining, high precision at precision machining)
- NC parameter such as maximum feed and accelation time constant can be set automatically.

## **High Rigidity**

The highly-rigid body found on the VM series enables exceptionally heavy-duty machining.

## **High Rigidity Design**

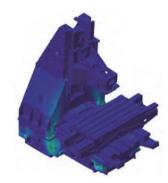

High Rigidity construction is achieved by 3D computer simulation.

#### Static rigidity

The high rigidity structure of VM series has raised the static rigidity up by 30% more than previous model with no weak point through FEM analysis.

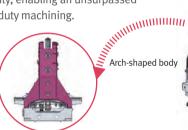

#### Dynamic rigidity

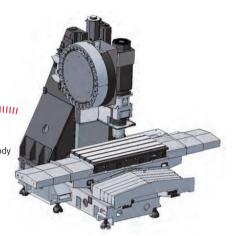

Improving the frequency response and the damping ability of vibration makes it possible to increase the high eigenfrequency 30% up on the previous model.

• FEM analysis used to design a stable body. (FEM: Finite Elements Method)

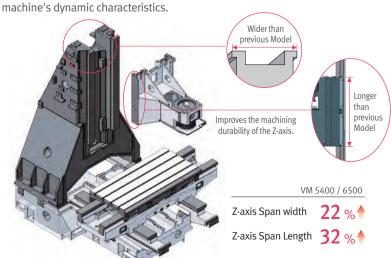

The highly-rigid body structure is obtained by using the latest FEM analysis method, which optimizes the static and dynamic stiffness characteristics of the VM series. The resulting arch-shaped body structure provides an unrivalled level of rigidity, enabling an unsurpassed performance in heavy-duty machining.

## **Broader Box Guideways**

Compared to the previous models, the broader box guideways greatly improve the

## Scraping of surface

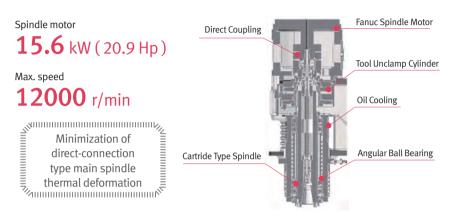

The sliding surface of each guideway is bonded with Rulon® 142 to reduce friction, then hand scraped for a perfect fit.

## High Speed / Precision Built-in Spindle

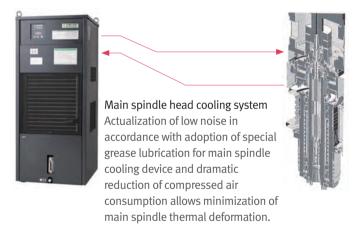

Since the main spindle is supported by 4 rows of P4 level high precision bearings, it maintains stable precision under high speed cutting operation for long periods. Moreover, the high torque 15.6 kW (20.9 Hp) direct connection type main spindle motor is equipped for high speed mold processing.

## High Speed / Precision Built-In Spindle

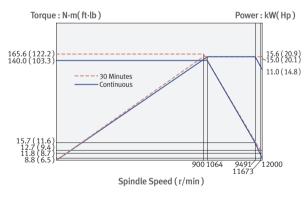

#### Low friction and heat generation of main spindle

#### Spindle power- torque diagram

### Z-axis free fall prevention function statement of the sta

Prevention of damage caused by Z axis freefall following power shutdown is included as standard.

#### Face / taper contact spindle std. Air Blower std. (BBT40)

Common utilization of BT40 Tool and 2-face binding tool (BIG PLUS)

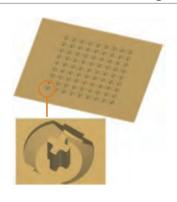

Dry processing and easy MQL connection

## High speed / High precision

The unsurpassed quality and accuracy of the DVM series achieves world-class performance in the machining of die & mold products.

## **High Productivity**

#### Cycle time of rubber die machining

The comparison of cycle time (actual result

A competitor's machine 42hr 20min

VM 5400 **37**hr **50**min

#### PDA mold processing

The comparison of cycle time ( actual result

A competitor's machine
1hr 48min 38s

VM 5400 1hr 23min 29s

#### VASE (Verification sample) cycle time

The comparison of cycle time ( actual result

A competitor's machine 25min 42s

VM 5400 **23**min **26**s

#### Air filter mold processing

The comparison of cycle time ( actual result )

A competitor's machine 89hr 42min

VM 5400 **80**hr **55**min

## Machining Capacity (VM 5400)

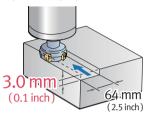

The VM series provides high machining performance in various cutting processes.

## **Machining Capacity**

#### Face mill BT40

Carbon steel (SM45C)

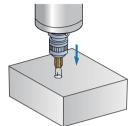

•ø80mm (3.15 inch) Face mill (5Z)

Machining rate	<b>427</b> cm <sup>3</sup> /min (16.8 in <sup>3</sup> /min)
Spindle speed	<b>750</b> r/min
Feedrate	<b>2226</b> mm/min (87.6 ipm)

## **Тар** вт40

Carbon steel (SM45C)

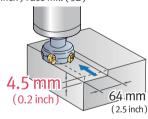

Tool	M30 x P3.5
Spindle speed	<b>220</b> r/min
Feedrate	<b>770</b> mm/min (30.3 ipm)

#### Face mill BT40

Gray Casting (GC25)

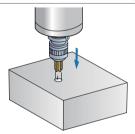

•ø80mm (3.15 inch) Face mill (5Z)

Machining rate	<b>732</b> cm <sup>3</sup> /min (28.8 in <sup>3</sup> /min)
Spindle speed	<b>1060</b> r/min
Feedrate	<b>2544</b> mm/min (100.2 ipm)

#### Тар вт40

Gray Casting (GC25)

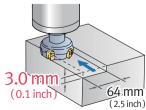

Tool	M36 x P4.0
Spindle speed	<b>200</b> r/min
Feedrate	<b>800</b> mm/min (31.5 ipm)

#### Face mill BT40

Aluminum (AL6061)

•ø80mm (3.15 inch) Face mill (5Z)

Machining rate	<b>1728</b> cm <sup>3</sup> /min (68.0 in <sup>3</sup> /min)
Spindle speed	<b>6000</b> r/min
Feedrate	<b>9000</b> mm/min (354.3 ipm)

The above data was collected as a standard in accordance with test standards of our company, which can be changed.

## **Chip Disposal**

Chip control is important to increase productivity and to enhance the operator's working environment. The VM series offers many features to optimize chip disposal.

## **Chip Removal**

#### Inner structure for effective chips and coolant flow

The inner structure of the Mynx series machines is designed to lead the flow of chips and coolant into a front-mounted chip pan for effective chip disposal.

## **Easy Set-up**

## Operating Console @

10.4" Color TFT LCD Monitor as Standard Feature

The wide screen displays more useful infromation for the operator. Doosan's customized pages make setting up, operating, and machine conditionmonitoring easier.

- 2 Pentium Board is standard.
- 3 Portable MPG
  It makes workpiece setting easier for the operator
- **4** Easier ATC operation and maintenance.

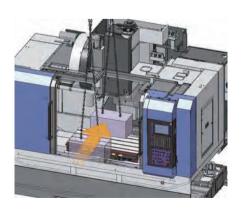

It gives much easier operation and maintenance for ATC.

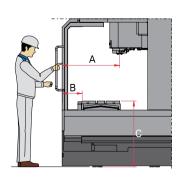

- **5** PCMCIA Card
- **6** Embedded Ethernet / RS-232C
- Swivelling Operating Console

The easy-to-use operation panel can swivel 0-90°

## Workpiece loading

## Accessibility

Unit: mm (inch)

A VM 5400 **830** (32.7)

VM 6500 **895** (35.2)

B VM 5400 **290** (11.4)

VM 6500 **224** (8.8)

VM 5400 **950** (37.4)

## Easy Operation Package \*EOP (Easy Operation Package)

Doosan's easy operation software package is customized to provide fast and easy operation for tooling, workpiece and program setup. These features maximize productivity by minimizing time lost during process setup.

## **Programming**

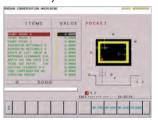

- Doosan Fanuc 32i-B
  - Embedded Ethernet
- 10.4" color TFT LCD

#### G Code List

Operator can check the meaning of each G-code.

#### Pattern Cycle

It is easy to make pattern cycle program by this funciton.

#### M Code List

Operator can check the meaning of each M-code.

#### Calculator

Operator can calcute numerical formula in relation to arc and hole

#### Tool Data Registry Table

Operator can edit & check the tool number of the tool magazine pot.

It makes "Engraving" programming easy.

## **Operation / Maintenance**

#### **Table Moving for Setup**

Enables quick and easy table movement to either of three positions during setup.

#### Easy NC Parameter Help

Operator can check some useful parameters for easy operation.

#### ATC Recovery Help

Allows easy recovery of ATC from ATC alarm status.

#### **Operation Rate**

Manages working and operation times for each operator.

#### Sensor Status Monitor

Solenoid valve and sensor status can be checked without the electric diagram.

#### Tool Load Monitor opt

Damage to tools is minimized by monitoring the axis and spindle load during cutting operations.

#### Alarm Guidance

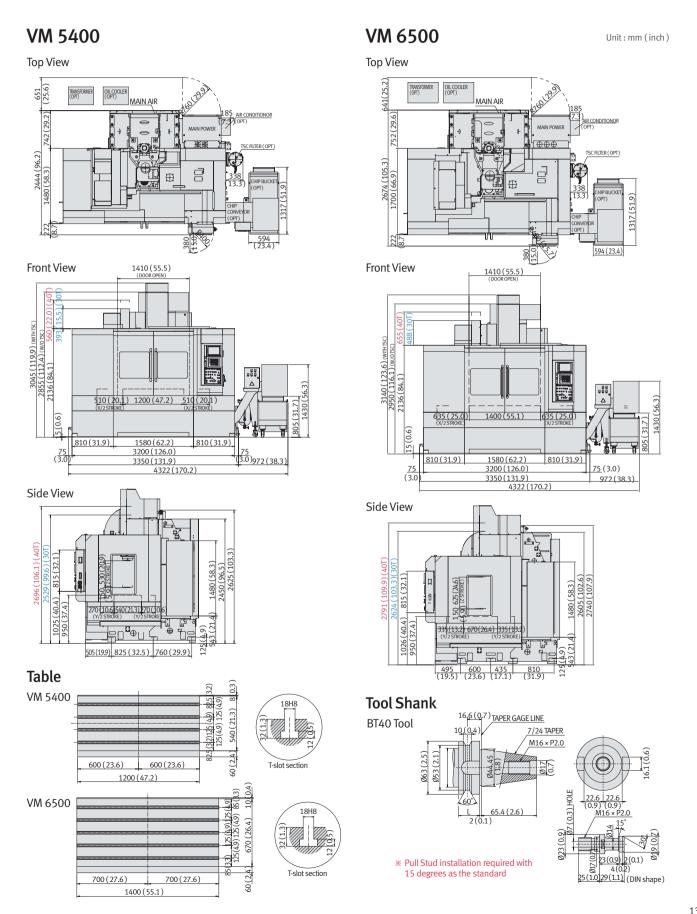

The alarm remedy method for selected important alarms is displayed on the screen.

## Renishaw Gui Opt. Tool measure Work measure

Tooling and the work piece measurement are operated through a conversational control screen.

## **External Dimensions**

#### **Standard Feature**

- Air blower
- Assembly & operation tools
- Automatic power off
- Coolant tank & chip pan
- Door interlock
- DSQ1 (AICC II \_ 200 Block + Machine condition selection function)
- Full enclosure splash guard

- Installation parts
- Portable MPG
- Screw conveyor
- Signal tower (red, yellow, green)
- Spindle head cooling system
- work light

- 3th axis MPG
- 4th axis preparation
- Air dryer
- Automatic tool length measurement with sensor
- Automatic tool measurement
- Chip conveyor & chip bucket
- DSQ2 (DSQ1+Data server [1GB])
- Mist Collector

#### **Optional Feature**

- Rotary table
- Test bar (BT40)
- Through spindle coolant

<sup>•</sup> The specifications and information above-mentioned may be changed without prior notice.

## **NC Unit Specifications**

## FANUC 32i-B

- Tool length measurement

- Controlled axes	3 (X, Y, Z
- Simultaneously controllable axes	
Posi	tioning(G00)/ Linear interpolation (G01): 3 axe
	Circular interpolation (G02, G03): 2 axe
- Backlash compensation	
- Emergency stop/overtravel	
- Follow up	
- Least command increment	0.001mm / 0.0001inc
- Least input increment	0.001mm / 0.0001inc
- Machinelock	All axes/ Z axi
	axis movement ( Setting screen and M - function
- Stored pitch error compensation	Pitch error offset compensation for each axi
- Stored stroke check 1	Overtravel controlled by softwar
- Absolute pulse corder	Overtiavel controlled by Softwar
71050tate paise coraci	
INTERPOLATION & FEED FUNCTI	ON
- 2nd reference point return	G3
- Circular interpolation	G02, G0
- Dwell	G0
- Exact stop check	G09, G61 ( mode
- Feed per minute	
- Feedrate override ( 10% increments )	0 - 200%
- Jog override ( 10% increments )	0 - 2009
- Linear interpolation	GO
- Manual handle feed 1 unit	
- Manual handle feedrate	x1, x10, x100 ( per pulse
- Override cancel	M48 / M4
- Positioning	G0
- Rapid traverse override	F0 (fine feed), 25 / 50 / 1009
- Reference point return	G27, G28, G2
- Skip function	G3
- Helical interpolation	Jaction function) 200 black proving
- DSQ1 (AICC II+ Machining condition se	election function) 200 block preview G9
- Thread cutting, synchronous cutting     - Program restart	9
- Automatic corner deceleration	
Feedrate clamp by circular acceleration	
- Linear ACC / DEC before interpolation	
- Linear ACC / DEC after interpolation	
- Rapid traverse bell-shaped acceleration	n/deceleration
- Smooth backlash compensation	
SPINDLE & M-CODE FUNCTION	
- M- code function	M3 digit
- Spindle orientation	
- Spindle serial output	
- Spindle speed command	S5 digit
- Spindle speed override (10% incremen	nts) 50 - 1509
- Spindle output switching 1st	
- Retraction for rigid tapping	
- Rigid tapping	G84, G7
TOOL FUNCTION	
- Tool nose radius compensation	G40, G41, G4
- Number of tool offsets	64e
- Tool length compensation	G43, G44, G4
- Tool number command	T2 digit
- Tool life management	
- Tool offset memory C	H/D code, Geometry / Wear memor
